

lavamac

your laundry solution

senso.dry®

SENSODRY®

- Another unique option is the SensoDry® system. This is an integrated system of measurement of the residual moisture which makes the dryers ideal for SoftWash® - Lavamac wet cleaning system.
- The user can initially program the required moisture level and the machine will then stop when the desired level of dryness is achieved. Eliminates the need to continually stop the machine and manually check the dryness by hand.

radax® airflow

RADAX®

- Combination of radial & axial airflow
- Lower energy costs
- Higher efficiency
- Maximal heat transfer
